

Intel® Setup and Configuration Software

(Intel® SCS)

Platform Discovery Utility – release notes

October 2015

Version 11.0

License

Intel® Setup and Configuration Software (Intel® SCS) is furnished under license and may only be used or copied in accordance with the terms of that license. For more information, refer to the “Exhibit A” section of the “Intel(R) SCS License Agreement.rtf”, located in the Licenses folder.

Legal Information

No license (express or implied, by estoppel or otherwise) to any intellectual property rights is granted by this document.

Intel disclaims all express and implied warranties, including without limitation, the implied warranties of merchantability, fitness for a particular purpose, and non-infringement, as well as any warranty arising from course of performance, course of dealing, or usage in trade.

The products described may contain design defects or errors known as errata which may cause the product to deviate from published specifications. Current characterized errata are available on request.

Intel technologies’ features and benefits depend on system configuration and may require enabled hardware, specific software, or services activation. Performance varies depending on system configuration. Check with your system manufacturer or retailer.

No computer system can be absolutely secure. Intel does not assume any liability for lost or stolen data or systems or any damages resulting from such losses.

Intel® AMT should be used by a knowledgeable IT administrator and requires enabled systems, software, activation, and connection to a corporate network. Intel AMT functionality on mobile systems may be limited in some situations. Your results will depend on your specific implementation.

Learn more by visiting [Intel® Active Management Technology](#).

Intel® vPro™ Technology requires setup and activation by a knowledgeable IT administrator. Availability of features and results will depend upon the setup and configuration of your hardware, software and IT environment. Learn more at: <http://www.intel.com/technology/vpro>.

KVM Remote Control (Keyboard, Video, Mouse) is only available with Intel® Core™ i5 vPro™ and Core™ i7 vPro™ processors with integrated graphics and Intel® Active Management technology activated. Discrete graphics are not supported.

Intel, Intel vPro, and the Intel logo, are trademarks of Intel Corporation in the U.S. and/or other countries.

1 Introduction

This document describes new features and changes made in version 11.0 of the Intel® Setup and Configuration Software (Intel® SCS) Platform Discovery Utility.

1.1 Changes to Platform Discovery Utility

These changes were made to the output of the Platform Discovery Utility:

- Updated detection methods for Pro WiDi prerequisites and Wi-fi adapters.
- Removed Intel® Identity Protection Technology with MFA.
- Updated detection method for Intel® Identity Protection with PKI.

1.2 Added Support for Intel Authenticate

The Platform Discovery Utility now supports discovery of Intel® Authenticate.

The GUID for Intel Authenticate is b4efb937-7caf-4b51-bc30-2224c5790f11

This is an example of the data returned by the Platform Discovery Utility when a platform supports Intel Authenticate.

```
<Solution uuid="b4efb937-7caf-4b51-bc30-2224c5790f11"
  name="Intel(R) Authenticate" exist="true" managed="false" state="supported">
  <Hardware version="Intel AMT"/>
  <Software name="Intel(R) Authenticate Service" required="true" available="false" />
  <FrameworkPlugin available="True"/>
</Solution>
```
