“Binary Code” means the executable, binary code derived from Source Code or a Derivative.

“Contractor” means a third party consultant or subcontractor who performs work on Licensee’s behalf that requires access to or use of Software.

“Documentation” means the documentation accompanying the Software, including but not limited to, reference design information, data sheets, schematics and any other information provided by Intel for the Software.

“End User” means a purchaser, recipient or any other user of Licensee’s Intel-based Device who does not resell the device.

“Intel-based Device” means a computing device (e.g., a phone, tablet or wearable device) that includes a hardware product sold by Intel (such as an Intel® Atom™ processor or an Intel designed cellular modem) that each particular module of Software is designed to execute on.

“Licensed Patent Claims” means the claims of Intel’s patents that are necessarily and directly infringed by the reproduction and distribution of the Software that is authorized in the Limited License, when that Software is in its unmodified form as delivered by Intel to Licensee and not modified or combined with anything else. “Open Source Software” means any software that requires as a condition of use, modification and/or distribution of such software that such software or other software incorporated into, derived from or distributed with such software: (a) be disclosed or distributed in Source Code form; (b) be licensed for the purpose of making derivative works; and (c) be redistributable at no charge. Open Source Software includes, without limitation, software licensed or distributed under any of the following licenses or distribution models, or licenses or distribution models similar to any of the following: (i) GNU’s General Public License (GPL) or Lesser/Library GPL (LGPL); (ii) the Artistic License (e.g., PERL); (iii) the Mozilla Public License; (iv) the Netscape Public License; (v) the Sun Community Source License (SCSL); (vi) the Sun Industry Source License (SISL); and (vii) the Common Public License (CPL). "Software" means any computer programming code, in Binary Code as may be provided or otherwise made available by Intel to Licensee, and any updated or improved version of the programming code that Intel provides under this Agreement, if any, but does not include Open Source Software or any computer programming code that is subject to an agreement, obligation or license (whether or not accompanying the computer programming code) intended to supersede this Agreement.

"Source Code" means a form in which computer programming code logic is easily deduced by a human being with skill in the art, such as a printed listing of the computer programming code or a form from which a printed listing can be recognized.

LIMITED LICENSE. Subject to the terms and conditions of this Agreement, Intel grants to Licensee a limited, nonexclusive, nontransferable, revocable, worldwide, fully paid-up license during the term of this Agreement, without the right to sublicense:

- (A) under Intel's copyrights and (subject to the third party licensing requirements reflected herein, if any) Intel's suppliers' copyrights, to:
 - (1) reproduce and publicly perform a Binary Code representation of the Software provided or otherwise made available by Intel to Licensee or of any Derivatives in each case only when integrated with and executed by an Intel-based Device, subject to the third party licensing requirements reflected herein, if any;
 - (2) distribute a Binary Code representation of the Software or of any Derivatives, with or to an Intel-based Device solely for execution by an Intel-based Device, and if to an End User, pursuant to a license agreement with terms and conditions at least as restrictive as those contained in the Intel End User Software License Agreement attached as Exhibit A;
 - (3) prepare derivative works of, reproduce and distribute any End-User documentation that may accompany the Software and that is not subject to obligations of confidentiality, but only in association with the Software; and
 - (4) reproduce any Documentation that may accompany the Software and distribute such Documentation in association with the Intel-based Device, solely in accordance with confidentiality obligations;
- (B) under Intel's Licensed Patent Claims to the Software in the form provided by Intel, to:
 - (1) reproduce the Software internally only;
 - (2) use the Software internally only;
 - (3) offer to distribute, and distribute, but not sell, the Software only to the extent necessary for Licensee to exercise its rights under the copyright license granted in Section (A)(2) above;
 - (a) provided, however, that Licensee may only distribute the Software under an agreement having terms and conditions at least as restrictive as those contained in Intel's End User Software License Agreement attached as Exhibit A, and only for use in or with Intel-based Devices; and
 - (b) provided, further, that the license under the Licensed Patent Claims does not and will not apply to any modifications to, or derivative works (including Derivatives) of, the Software, whether made by or on behalf of Licensee, by any of Licensee's customers (which, for all purposes under this Agreement, will mean either a customer or a distributor), or any other third party even if the modifications and derivative works (including Derivatives) are authorized under Section (A) above.

LICENSE LIMITATIONS.

- (A) All right, title and interest in and to the Software and associated Documentation are and will remain the exclusive property of Intel and its suppliers, as applicable. Unless expressly permitted under the Limited License, above, Licensee will not, and will not allow any third party to:
 - (1) use, copy or distribute the Software or associated Documentation;
 - (2) modify, adapt, enhance, disassemble, decompile, reverse engineer, change or create derivative works from the Software, except and only to the extent as specifically required by mandatory applicable laws or any applicable third party software license terms accompanying the Software; or
 - (3) use or make the Software available for the use or benefit of third parties.
- (B) The consideration under this Agreement is only for the licenses that Intel expressly grants above. Any other rights including, but not limited to, additional patent rights, will require an additional license and additional consideration. Nothing in this Agreement requires or will be treated to require Intel to grant any additional license. Licensee acknowledges that an essential

basis of the bargain in this Agreement is that Intel grants Licensee no licenses or other rights including, but not limited to, patent, copyright, trade secret, trademark, trade name, service mark or other intellectual property licenses or rights with respect to the Software and associated Documentation, by implication, estoppel or otherwise, except for the licenses expressly granted above. Specifically, except for the licenses that Intel expressly grants above, Intel grants no licenses or other rights, expressly or by implication, estoppel or otherwise, to:

- (1) make, use, sell, offer for sale, or import modifications or derivative works of the Software;
 - (2) sell or offer to sell the Software;
 - (3) combine the Software or modified versions or derivative works of the Software with other items or to use any such combination; or
 - (4) any claims of any patents, patent applications, or other patent rights of Intel other than the Licensed Patent Claims.
- (C) Licensee acknowledges that there are significant uses of the Software in its original, unmodified and uncombined form. The consideration for the licenses in this Agreement reflects Intel's continuing right to assert patent claims against any modifications or derivative works (including, without limitation, error corrections and bug fixes) of, or combinations with, the Software that Licensee or third parties make that infringe any Intel patent claim.
- (D) Except as expressly permitted under the license grant above, Licensee will not allow the Software or associated Documentation to be accessed or used by third parties. Notwithstanding the foregoing, Licensee's Contractors may access the Software in Binary Code and associated Documentation where the access is necessary to their performing services on Licensee's behalf, consistent with the licenses granted to Licensee under this Agreement, provided:
- (1) Licensee first requires those Contractors to sign written agreements obligating them to observe the same restrictions concerning the Software and associated Documentation as contained in this Agreement;
 - i and
 - (2) Licensee remains fully liable to Intel for the actions and inactions of those Contractors.

FEEDBACK. Should any comments, suggestions, descriptions, ideas or any other feedback on the Software or Documentation (collectively "Feedback"), be provided by or on behalf of Licensee to Intel, however provided and however designated, whether written or verbal, whether marked or labeled, Intel will be free to use, disclose, reproduce, and license or otherwise distribute or exploit such Feedback at its sole discretion, without any obligations or restrictions of any kind, including without limitation, intellectual property rights or licensing obligations.

MODIFICATIONS: To ensure Intel's freedom to operate and to continue to develop the Software licensed hereunder, Licensee agrees to grant and does hereby grant to Intel a non-exclusive, perpetual, irrevocable, worldwide, royalty-free, fully paid-up and transferable license, with the right of sublicense, to and under any copyrights, trade secrets, patents and any other intellectual property rights, whether perfected or not, to publically perform, publically display, reproduce, use, make, have made, sell, offer for sale, distribute, import, copy, create derivative works of and otherwise exploit any derivative works, including Derivatives, created from or otherwise including the Software.

RIGHT OF INSPECTION. At any time during the term of this Agreement, Intel has the right, by giving Licensee reasonable notice to have an independent auditor inspect Licensee's relevant records to verify Licensee's compliance with the terms and conditions of this Agreement. Should the inspection reveal any material non-compliance with the terms of this Agreement, Intel has the right terminate this Agreement and all licenses granted hereunder.

OPEN SOURCE STATEMENT. The Software includes Open Source Software that is licensed pursuant to the applicable Open Source Software license agreement(s) identified in the Open Source Software comments in the applicable source code file(s) and/or file header(s) provided with or otherwise associated with the Software. Additional detail may be provided (where applicable) in the accompanying on-line documentation, or within the user interface of the device, if any. With respect to Open Source Software, nothing in this Agreement limits any rights under, or grants rights that supersede, the terms of any applicable Open Source Software license agreement. Neither Licensee nor any OEM, ODM, customer, or distributor, will subject the Software or associated Documentation, in whole or in part, to any license obligations associated with Open Source Software including combining or distributing the Software and/or Documentation with Open Source Software in a manner that subjects Intel or any portion of the Software to any license obligations of such Open Source Software.

THIRD PARTY SOFTWARE. Certain third party software provided with or within the Software may only be used (a) upon securing a commercial license directly from the owner of the software unless explicitly stated otherwise in a document attached to this Agreement or attached to the software, or (b) in combination with silicon purchased from such third party.

CONFIDENTIALITY. The terms and conditions of this Agreement, the exchange of Confidential Information, as well as the Software and associated Documentation are subject to the terms and conditions of the Corporate Non-Disclosure Agreement by and between Intel and Licensee (CNDA) in force between the parties. If Licensee would like to have a Contractor perform work on Licensee's behalf that involves access to or use of Software, Licensee will obtain a written confidentiality agreement from the Contractor which contains terms and conditions with respect to access to or use of Software no less restrictive than those set forth in this Agreement and the CNDA, and excluding any distribution rights and use for any other purpose, and Licensee will remain fully liable to Intel for the actions and inactions of those Contractors. Otherwise, Licensee must not disclose the terms or existence of this Agreement, and must not use Intel's name in any publications, advertisements, or other announcements without Intel's prior written consent. Licensee does not have any right to use any Intel trademarks or logos.

OWNERSHIP OF SOFTWARE AND COPYRIGHTS. Title to all copies of the Software and associated Documentation remains with Intel or its suppliers, as applicable. The Software is copyrighted and protected by the laws of the United States and other countries, and international treaty provisions. Licensee may not remove any copyright notices from the Software or associated Documentation.

SUPPORT. Intel may make changes to the Software, or to items referenced therein, at any time without notice, but is not obligated to support, update or provide training for the Software. Intel may in its sole discretion offer such services under separate terms at Intel's then-current rates. Licensee may request additional information on Intel's service offerings from an Intel sales representative. Licensee agrees to be solely responsible to Licensee's End Users for any update or support obligation or other liability which may arise from the distribution of the Software.

EXCLUSION OF WARRANTIES. THE SOFTWARE IS PROVIDED "AS IS" WITHOUT ANY EXPRESS OR IMPLIED WARRANTY OF ANY KIND INCLUDING WARRANTIES OF MERCHANTABILITY, NONINFRINGEMENT, OR FITNESS FOR A PARTICULAR PURPOSE. Intel does not warrant or assume responsibility for the accuracy or completeness of any information, text, graphics, links or other items contained within the Software.

LIMITATION OF LIABILITY. IN NO EVENT WILL INTEL OR ITS AFFILIATES OR SUPPLIERS (INCLUDING THEIR RESPECTIVE DIRECTORS, OFFICERS, EMPLOYEES, AND AGENTS) BE LIABLE FOR ANY DAMAGES WHATSOEVER (INCLUDING, WITHOUT LIMITATION, LOST PROFITS, BUSINESS INTERRUPTION, OR LOST INFORMATION) ARISING OUT OF OR IN RELATION TO THIS AGREEMENT, INCLUDING THE USE OF OR INABILITY TO USE THE SOFTWARE, EVEN IF INTEL HAS BEEN ADVISED OF THE POSSIBILITY OF SUCH DAMAGES. SOME JURISDICTIONS PROHIBIT EXCLUSION OR LIMITATION OF LIABILITY FOR IMPLIED WARRANTIES OR CONSEQUENTIAL OR INCIDENTAL DAMAGES, SO THE ABOVE LIMITATION MAY IN PART NOT APPLY TO LICENSEE. LICENSEE MAY ALSO HAVE OTHER LEGAL RIGHTS THAT VARY FROM JURISDICTION TO JURISDICTION. THE SOFTWARE LICENSED HEREUNDER IS NOT DESIGNED OR INTENDED FOR USE IN ANY MEDICAL, LIFE SAVING OR LIFE SUSTAINING SYSTEMS, TRANSPORTATION SYSTEMS, NUCLEAR SYSTEMS, OR FOR ANY OTHER MISSION CRITICAL APPLICATION IN WHICH THE FAILURE OF THE SOFTWARE COULD LEAD TO PERSONAL INJURY OR DEATH. LICENSEE WILL INDEMNIFY AND HOLD INTEL AND ITS AFFILIATES AND SUPPLIERS (INCLUDING THEIR RESPECTIVE DIRECTORS, OFFICERS, EMPLOYEES, AND AGENTS) HARMLESS AGAINST ALL CLAIMS, LIABILITIES, LOSSES, COSTS, DAMAGES, AND EXPENSES (INCLUDING REASONABLE ATTORNEY FEES), ARISING OUT OF, DIRECTLY OR INDIRECTLY, THE DISTRIBUTION OF THE SOFTWARE AND ANY CLAIM OF PRODUCT LIABILITY, PERSONAL INJURY OR DEATH ASSOCIATED WITH ANY UNINTENDED USE, EVEN IF SUCH CLAIM ALLEGES THAT INTEL OR AN INTEL AFFILIATE OR SUPPLIER WAS NEGLIGENT REGARDING THE DESIGN OR MANUFACTURE OF THE SOFTWARE. THE LIMITED REMEDIES, WARRANTY DISCLAIMER AND LIMITED LIABILITY ARE FUNDAMENTAL ELEMENTS OF THE BASIS OF THE BARGAIN BETWEEN INTEL AND LICENSEE. AND INTEL WOULD NOT BE ABLE TO PROVIDE THE SOFTWARE WITHOUT SUCH LIMITATIONS.

TERMINATION OF THIS AGREEMENT. Upon notice, Intel may terminate this Agreement immediately, if Licensee violates any of its terms or conditions. Upon termination, Licensee will immediately destroy the Software (including providing certification of such destruction back to Intel) or return all copies of the Software to Intel. In the event of termination of this Agreement, all licenses granted to Licensee hereunder terminate immediately.

GOVERNING LAW AND JURISDICTION. This Agreement and any dispute arising out of or relating to it will be governed by the laws of the United States and Delaware, without regard to conflict of laws principles. **The parties exclude the application of the United Nations Convention on Contracts for the International Sale of Goods (1980).** The state and federal courts sitting in Delaware, USA will have exclusive jurisdiction over any dispute arising out of or relating to this Agreement. The parties consent to personal jurisdiction and venue in those courts. A party that obtains a judgment against the other party in the courts identified in this section may enforce that judgment in any court that has jurisdiction over the parties.

EXPORT REGULATIONS/EXPORT CONTROL. Licensee acknowledges that the Software and all related technical information or materials are subject to export controls under the laws and regulations of the United States and any other applicable governments. Licensee agrees to comply with these laws and regulations governing export, re-export, import, transfer, distribution, and use of the Software, technical information and materials. In particular, but without limitation, the Software, technical information and materials may not be exported or re-exported (a) into any U.S. embargoed countries or (b) to any person or entity listed on a denial order published by the U.S. government or any other applicable governments. By using the Software, technical information and materials, Licensee represents and warrants that it is not located in any such country or on any such list. Licensee also agrees that Licensee will not use the Software, technical information and materials for any purposes prohibited by the U.S. government or other applicable governments' law, including, without limitation, the development, design, manufacture or production of nuclear, missile, chemical or biological weapons. Licensee confirms that the Software, technical information and materials will not be re-exported or sold to a third party who is known or suspected to be involved in activities including, without limitation, the development, design, manufacture, or production of nuclear, missile, chemical or biological weapons. Licensee agrees that any Software, technical information or materials subject to control under defense laws and regulations (e.g., the International Traffic in Arms Regulations [ITAR]) must not be transferred to non-U.S. persons, whether located in the U.S. or abroad, without a government license.

GOVERNMENT RESTRICTED RIGHTS. The Software is a "commercial item" as that term is defined in 48 C.F.R. 2.101, consisting of "commercial computer software" and "commercial computer software documentation" as such terms are used in 48 C.F.R. 12.212. Consistent with 48 C.F.R. 12.212 and 48 C.F.R. 227.7202-1 through 227.7202-4, Licensee will provide the Software to the U.S. Government as an End User only pursuant to the terms and conditions therein. Contractor or Manufacturer is Intel Corporation, 2200 Mission College Blvd., Santa Clara, CA 95054.

ASSIGNMENT. Licensee may not delegate, assign or transfer this Agreement, the license(s) granted or any of Licensee's rights or duties hereunder, expressly, by implication, by operation of law, by way of merger (regardless of whether Licensee is the surviving entity) or acquisition, or otherwise and any attempt to do so, without Intel's express prior written consent, will be null and void. Intel may assign, delegate and transfer this Agreement, and its rights and obligations hereunder, in its sole discretion.

ENTIRE AGREEMENT. The terms and conditions of this Agreement constitute the entire agreement between the parties with respect to its subject matter, and merge and supersede all prior, contemporaneous agreements, understandings, negotiations and discussions. Neither of the parties hereto will be bound by any conditions, definitions, warranties, understandings, or representations with respect to this subject matter other than as expressly provided for in this Agreement. Intel is not obligated under any other agreement unless it is in writing and signed by an authorized representative of Intel. *Without limiting the foregoing, terms and conditions on any purchase orders or similar materials submitted by Licensee to Intel, and any terms contained in Intel's standard acknowledgment form that are in conflict with these terms, will be of no force or effect with respect to the Software.*

ATTORNEY'S FEES. In the event any proceeding or lawsuit is brought by Intel or Licensee in connection with this Agreement, the prevailing party in such proceeding will be entitled to receive its costs, expert witness fees and reasonable attorneys' fees, including costs and fees on appeal.

NO AGENCY. No agency, franchise, partnership, joint-venture, or employee-employer relationship is intended or created by this Agreement.

SEVERABILITY. In the event that any provision of this Agreement is unenforceable or invalid under any applicable law or be so held by applicable court decision, such unenforceability or invalidity will not render this Agreement unenforceable or invalid as a whole, and, in such event, such provision will be changed and interpreted so as to best accomplish the objectives of such unenforceable or invalid provision within the limits of applicable law or applicable court decisions.

WAIVER. The failure of either party to require performance by the other party of any provision hereof will not affect the full right to require such performance at any time thereafter; nor will the waiver by either party of a breach of any provision hereof be taken or held to be a waiver of the provision itself.

LANGUAGE. This Agreement is in the English language only, which language is controlling in all respects, and all versions of this Agreement in any other language are for accommodation only and will not be binding on Licensee or Intel. All communications and notices made or given pursuant to this Agreement, and all documentation and support to be provided, unless otherwise noted, will be in the English language.
