 - Recommend latest patch level
 - Small Business hub requires Windows* 10
- Microsoft* .NET 4.5
- Intel® Core™ vPro™ processor based PC
- 4GB RAM
- 100MB available HDD space

Client

- Windows* 7 SP1, 8, 8.1, 10 (32-bit and 64-bit)
 - Recommend latest patch level
 - Windows* 10 requires the media pack
- Microsoft* .NET 4.5
- 1GB RAM
- 50MB available HDD space

Server

- Windows* Server 2008 R2 or greater (32-bit and 64-bit)
 - Recommend latest patch level
- Microsoft* SQL Server 2008 R2 or greater
- IIS
- Microsoft* .NET 4.5

Release Notes 3.2.110.13

Build 3.2.110.13 contains an update to 3.2.96.8.11 which resolves an issue while presenting to the latest 3.3 hub version.

Please refer to the release notes for 3.2.96.8 for important compatibility information.

Release Notes 3.2.96.8

WebRTC Update

The Intel Unite® app for both the Windows* client and hub version 3.2.96.8 have been updated to include WebRTC version 59, which includes functional and security updates. Users should update to the latest version.

Backwards Compatibility Notice

Due to this update, previous versions of the Windows* clients will not be able to present to this version of the hub unless the Windows* client app is updated to build 3.2.96.8 or later.

The MacOS* and Chrome OS* client apps will still be able to present without being updated.

Intel recommends updating the Windows* client app prior to updating the hub application in your environment.

Known Issues

Previous Known Issues

ID	Feature	Issue	Resolution	Status
DE5676	Windows Client	If you unplug a USB extended display while using it to present, a black screen is shown on the hub.	Errata. Click stop presenting.	Investigating
DE5757	Hub	When presenting in windowed mode and you minimize then window it is not placed in the task bar.	Errata	Investigating
DE5628	Hub	When presenting A/V from more than two clients and the hub in windowed mode, the displayed screens may be overlapped.	Errata	Investigating
DE5815	Windows Client	When presenting from the virtual extended display and a USB extended display is connected to	Errata. Click stop presenting.	Investigating

		the client, the virtual extended display continues to present.		
DE5962	Hub	If the hub is running in pin only mode and a user selected full screen mode in the media player, the hub PIN can be covered up.	Errata. Exit full screen mode or use maximize.	Investigating
DE4743	Mac Client Preferences	You are not able to access the preferences within the Mac client if the Enterprise server is not found	Errata. Ensure you can connect to an enterprise server. Also, manual configuration is still possible, refer to the User Guide	Investigating
DE4712	Mac Client	If you present and view your content at the same time (creating the infinity mirror of your desktop), the Mac client will stop sending updates to the hub after a while	Errata. Stop presenting.	Investigating
DE4567	Virtual Extended Display	If a user starts the virtual extended display on a Windows 7 client system, then drags the mouse to the local screen, the user may see the mouse cursor pulse every few seconds.	Errata. No workaround available.	Investigating
DE4561	Present Application / Mac Client	When presenting an application full screen using the Present Application feature with a Mac, the hub will show black.	Errata. Users can use the Present Desktop feature when presenting a full screen app, or just maximize the app instead of setting it to full screen.	Investigating
DE4496	Admin Portal	If a user has the language set to Japanese or Korean, the date picker calendar will show the year	Errata. No workaround available	Investigating

	Telemetry Page	and month in an uncommon format		
DE4908	Intel Unite for Small Business / Mac Client	With El Capitan, small business mode does not time out with an incorrect pin.	Errata. Exit the application and restart then enter the correct pin.	Investigating
DE4934	Intel Unite for Small Business	If an incorrect pin is entered that resolves to an IP that has a web server, the client application will hang.	Errata. Close the Unite application, restart and enter the correct pin.	Investigating
DE3947	Present Application	If the client operating system is Windows 7 with Aero Mode disabled, and the user attempts to use Present Application, the content will not be displayed on the hub.	Errata. Present Screen.	Investigating
DE3520 DE5756	Window Mode	When the hub has Window mode enabled and a user attempts to resize the widow vertically using the vertical-only frame, the window will resize but the content being displayed to the hub will not be scaled correctly.	Errata. A user can use the corners to resize the window.	Investigating
DE3503	A/V Mode	If a client attempts to change their resolution while presenting using A/V mode, the content displayed on the hub is not scaled correctly.	Errata. Do not change resolution while presenting.	Investigating
DE3474	A/V Mode	If a hub has a resolution set below 1280x720 and 3 client present at the same time; 2 using A/V mode, and the 3 rd using legacy mode (present an application, or v1, v2 client, or Mac client); The A/V Content will overlap the legacy content.	Errata. No workaround available.	Plan Fix
DE3461	Window Mode	If a hub has Window mode enabled and a client starts presenting, sometimes the mouse	Errata. The user can move their mouse to	Plan Fix

		may be in the incorrect position when the presentation starts.	reset the position.	
DE3445	A/V Mode in Window Mode	If a hub has both Window mode and A/V Mode enabled, plus multiple people are presenting A/V mode to the hub, and then you minimize the window on the hub, you will see tiny windows over the taskbar with the shared A/V content.	Errata. No workaround available.	Plan Fix
DE3370	Remote View	If a user with a 4K display presents with A/V mode disabled, and a remote participant views, the image may get cropped.	Errata. No workaround available.	Investigating
DE2892	Present An Application	On Windows 8, when you use the Present An Application feature and you maximize the window being presented, a small black line may be visible above the presentation on the Hub.	Errata. No workaround.	Plan Fix
DE2890	Extended Display	If you present an extended display, virtual or physical, place the Intel Unite application on the extended display, then disconnect the extended display, the Intel Unite user interface will not detect the disconnected monitor and the user interface will still show "Stop Presenting".	Errata. Do not place the Intel Unite application window on an extended display and then disconnect the monitor.	Plan Fix
DE2857	Multi-monitor	If you add another physical monitor after you have started Intel Unite, the monitor list won't dynamically get updated, thus the monitor won't appear in the list of available monitors to present.	Errata. To work around, users must restart Intel Unite if they connect a physical display.	Plan Fix
