The cosmic character who helps you learn

GREETINGS!

Dear Friend,

Hi! My name's ADI. Thank you for letting me into your computer, it's good to have a home after travelling the cosmos for so long. Together we can now have hours of fun and entertainment while you learn.

If you have any teething problems with this package you can ring my friends at Europress Software between 9am and 5pm on 0625 859333. Please fill in the registration form and send it in so Europress Software can let my family and friends know that I have arrived safely in my new home. I will automatically send you an informative and exciting newsletter which will also explain how you can write to ADI users in France and other European countries.

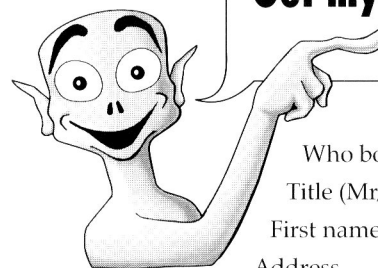

Finally, please encourage your friends to buy my software rather than illegally copying it. This will ensure that Europress can get me into other subjects such as Geography and Science in the near future.

Have fun,

ADI
