PC, ATARI ST & AMIGA QUICK KEYBOARD REFERENCE CARD

Instead of cycling through your weapon choices using the <ENTER> key you can directly access the weapon by pressing the < SHIFT> button simultaneously with the relevant function key eg: <SHIFT> F10 access the gun.

If you have a mouse/joystick, you can reconfigure any button (two or three button mice are compatible) to emulate the keyboard. Just press the <ALT> key with the required choice. Then press the ALT key and required joystick/mouse button (left, middle or right). For example, press <ALT> G ('G' accesses the landing gear). Then press the ALT key and left mouse button. From now on, pressing the left mouse button will access the gear.

Pressing <SHIFT> '+' or '-' doubles the RPM increments and decrements.

Pressing the escape key <ESC> or CTRL Q while your aircraft is on the ground will end the mission.

E - ECM ON/OFF

X - DOT GRID TOGGLE

BACKSPACE or CTRL H - BREAK LOCK (PC ONLY)
