

FIRE AND RESCUE

REASSURANCE IN AN UNPREDICTABLE WORLD

THOUGH WE STRIVE TO LIVE AND WORK SAFELY within our global environment, incidents, although relatively rare, are sometimes inevitable. Our roads are congested. Urban infrastructures ever more concentrated. As our business and leisure horizons continue to expand, more and more we find ourselves away from the beaten track where emergency help finds access difficult.

A small, localised fire could seriously jeopardise a large industrial plant. Underfoot conditions on a game farm, heathland or safari park may prove treacherous when getting equipment to an incident. With your business interests to protect, and when you need to react fast, Defender is the one emergency vehicle you can rely on to find a way through.

SPECIFICATION

WHEEL BASE OPTIONS

WEIGHT Kg	130
Standard	Single Cab/Double Cab
Maximum axle	
Front axle (kg)	1580
Rear axle (kg)	2200
Gross vehicle weight (kg)	3500
