Autobiography

Leave your mark. Let the world know there's no one quite like you.

Autobiography is designed to satisfy the needs of a very special group of Range Rover customers. In your life you take greater choice, wide-ranging style options and the most advanced facilities for granted. You like everything you possess to carry your personal imprint. It's an unmistakable signal that you have the ability to blend a measure of your taste and style into everything you own. If this approach to life sounds familiar, Autobiography is designed for you.

Interior

Leather

Range Rover's extensive choice of leather interior colours is widened impressively by the addition of ten new Autobiography colourways. Seat centre bands feature a perforated finish which adds a distinctive stylish touch and brings a number of practical advantages too. Perforations endow the leather's surface with special qualities, enabling it to breathe and allowing increased flexibility and comfort. Complementary tones have been chosen for each colourway pairing, stitched from hand-selected European and American hides of only the highest grades. An extended leather pack is included as part of your Autobiography leather interior.

In-Car Technology

Sound System

Logic 7 is a specialised sound system developed by harman/kardon with performance that borders on 'super-fi'. Harman/kardon's experts spent over a year tuning its 14 speakers and sub-woofer to match Range Rover's internal acoustic characteristics. The result is an aural experience that is rarely encountered outside a professional sound studio.

Twin Screen DVD

This is the latest twin-screen 8" DVD system, which includes a 6-disc auto changer in the rear loadspace. Twin screens allow passengers a great deal of choice - for instance they can watch TV on one screen and enjoy a movie on the other en route. When parked, the front TV screen also comes into play to present a three-screen choice of viewing. Anti-glare privacy glass is available as an option to enhance viewing.

Security

Land Rover Supaglass

In response to the world's fast-changing security environment, Land Rover has introduced Supaglass. This is a high-tech glass coating that offers improved protection against external threats as well as affording added safety in the event of an accident. Its non-shattering quality provides vital extra seconds to allow escape from threatening situations and also prevents broken glass from entering the passenger compartment in a collision.

Owners who require protection levels beyond toughened glass should ask for our Range Rover Protection & Security brochure. It details a range of defensive engineering measures that can withstand projectiles from hand guns, grenades and even high-velocity rifles.
