Key Features

• Easy-to-Use Interface

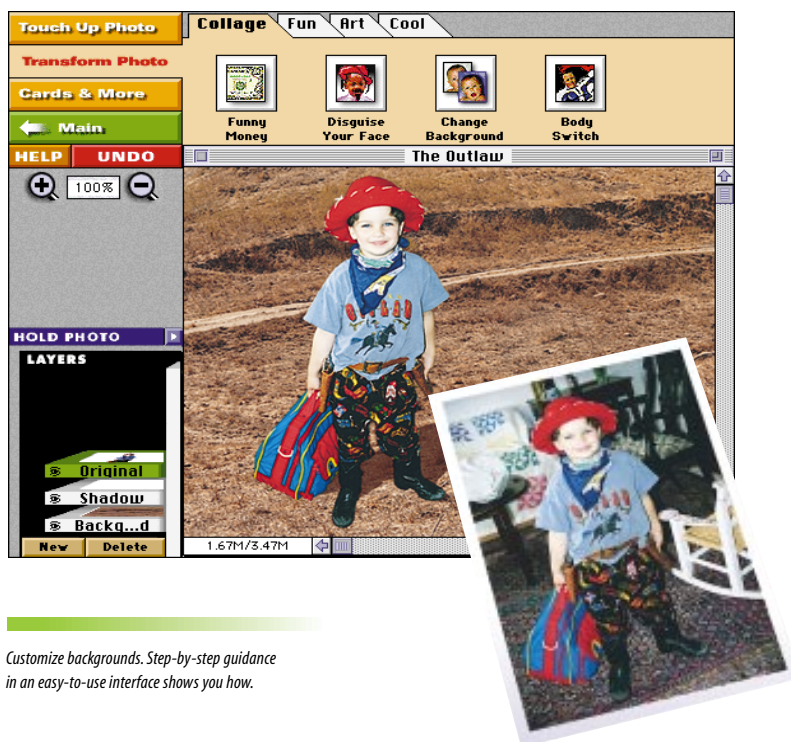

Don't have hours to learn new software? No problem. Just follow the intuitive visual-guide interface through all of your projects for fast, eye-popping results.

• Over 25 Guided Activities

More than 25 guided activities help you create special photo projects. Choose from three categories: Touch Up Photo, Transform Photo, and Cards & More. Each activity puts what you need to complete it right at your fingertips.

Wish you had taken a better picture? Try out Touch Up Photo. Fix all kinds of mistakes: sharpen or blur an image, remove unwanted "red-eye" effect, get rid of dust and scratches—even remove facial wrinkles and cover gray hair. Adjust the size of your photo, or trim out an unwanted background.

Want to do more than tidy up? With Transform Photo projects, you can create collages, disguise your in-laws and loved ones, or switch bodies and heads to achieve the shape you've always wanted—painlessly. Add text and—voilà—you have your own tabloid newspaper.

Customize backgrounds. Step-by-step guidance in an easy-to-use interface shows you how.

Or try a different project with Cards & More. Create personalized greeting cards and calendars, add borders to your photos, make and decorate holiday photocards, place yourself on a magazine cover, or use your favorite picture to customize an After Dark® screen saver.

Whatever project you choose, you can easily add in text, clip-art decorations, and artistic effects.

When you're finished, you can view your photographs and completed projects on-screen using the Slide Show feature.
